This Application is used to find the cookies value of the servlet. In this example we are creating a MIDlet (CookieMIDlet) for access the servlet.

J2ME Cookies Example

[←Prior](#) [Index](#) [Next→](#)

This Application is used to find the cookies value of the servlet. In this example we are creating a MIDlet (CookieMIDlet) for access the servlet. We are creating servlet

(J2MEServletExample) to find the cookies value. We are mapping the servlet in the web.xml file. In this example we are trying to display the cookies value on the mobile window by accessing the servlet from MIDlet.

The Application is as follows:
