This Application explain the use of Video Control. The work of video control is used to controls the display of video.

J2ME Video Control Example

<-PriorIndexNext->

This Application explain the use of Video Control. The work of video control is used to controls the display of video. In this example we want to show you, how to capture the video clip. The below source code shows you to create the player and capture the video.

Player

player = Manager.createPlayer("capture://video");

There are the following methods are used in the Video Control:

getDisplayHeight()
getDisplayWidth()
getDisplayX()
getDisplayY()
getSnapshot(java.lang.String imageType)
getSourceHeight()
getSourceWidth()
initDisplayMode(int mode, java.lang.Object arg)
setDisplayFullScreen(boolean fullScreenMode)
setDisplayLocation(int x, int y)
setDisplaySize(int width, int height)
setVisible(boolean visible)

To see details about video follow this link: <http://www.roseindia.net/j2me/video-midlet.shtml>

The application is as follows:
